Part 1 - Understanding this Report

Introduction

This Selection Report describes Mary Sample's suitability for the Manager position at Assess Advantage. The information in this report comes first from reviewing the scores on each of the scales of the Prevue Assessments that were completed by Mary Sample and second from comparing those scores to the Prevue Benchmark for the position. Both the scores on the Prevue Assessments and the comparison of those scores to the Prevue Benchmark are exhibited graphically in the Prevue Results Graph in Part 2.

Prevue Assessments

The Prevue Results Graph shows Mary Sample's 'sten' score on each of the Prevue Assessments scales considered in the report. A sten score is a candidate's score on a normal bell-shaped curve representing the general working population. The diagram below shows the normal bell curve divided into standard tenths ('standard tenths' is shortened to 'sten') for the Diplomatic vs. Independent Personality Scale. The diagram also shows the percentage of the general working population that will typically score in each sten.

The Prevue Benchmark shows the preferred characteristics of an employee for a particular position. These characteristics are displayed as a range of desired sten scores on each scale. This range is shaded and forms the benchmark for the scale. The candidate's assessment results are shown as circled numbers and compared to the shaded ranges. The Benchmark Suitability Score is derived from a formula analyzing the candidate's sten scores on the benchmark (circled score is inside the shaded range) versus those scores that are off the benchmark (circled score is outside the shaded range).

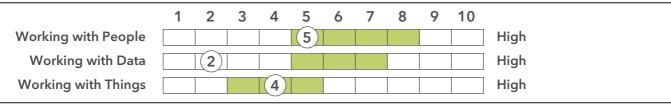

Example: The benchmark for the Diplomatic vs. Independent scale (shown above) is the shaded range of stens from 5 to 8. Scores 5,6,7 or 8 will be on the benchmark. Scores of 1,2,3,4,9 and 10 will be off the benchmark.

Part 2 - Prevue Results Graph

Mary Sample's scores are shown in the circled numbers on each of the Prevue scales presented below. The Prevue Benchmark for the Manager position is indicated by the green shaded ranges on each scale, which are preferred scores for this position. A score inside a shaded range is on the benchmark. A score outside a shaded range is off the benchmark.

Personality

Benchmark Suitability Score

The Benchmark Suitability Score quantifies Mary Sample's overall fit to the benchmark for the Manager position.

Note: Mary Sample's Prevue Assessments results, including the Benchmark Suitability Score should comprise no more than one-third of the selection decision process. Refer to Best Practice Information for details.

Part 3 - Total Person Description

The Total Person Description provides an overview of Mary Sample compared to the general working population. This profile is derived from the scores shown on the Prevue Results Graph.

Mary Sample has little interest in working with abstract information and data. While none of the candidate's preferences are marked, Mary is moderately inclined to work with people and with material objects. Mary is equally likely to solve problems through interaction with others or through direct hands-on action, preferably involving tools or machinery.

Mary Sample is intensely competitive and requires a high level of individual recognition. While this individual can enjoy team work, especially if they are the leader, they may have difficulty in situations that demand close cooperation. Mary handles most confrontation easily and enjoys making decisions. The candidate is assertive and usually direct in saying what they think, but Mary will compromise to maintain harmony in the workplace.

Mary Sample is an original and innovative thinker. As far as Mary is concerned, the rules are subject to interpretation and unforeseen developments are more likely to stimulate than intimidate. Therefore, this individual will often seek new ways to solve problems rather than follow established methods. Although preferring to act spontaneously, Mary is reasonably well organized and tidy. The candidate can make plans and work in a controlled manner, but they are not upset if they have to abandon those plans to cope with unexpected events. Mary is stimulated by new developments and a changing work environment.

Mary Sample enjoys the company of other people and can be troubled by extended periods of solitude. Most people will find this individual to be friendly and personable. Mary is quick to talk to others and enjoys their attention. While the candidate can listen effectively when concentrating, their instinct is to be the one doing the talking. Mary's enthusiasm is a tremendous advantage when presenting ideas. Though conversational and outgoing, Mary is also self-reliant and does not require constant social interaction. In a group setting, the candidate will occasionally command attention, but Mary is also comfortable as a quiet observer.

Usually calm and unruffled, Mary Sample will be upset by prolonged stress or exceedingly demanding tasks. In these conditions, this individual will be irritable, although they will strive to regain their composure. Because the candidate finds it difficult to trust others, they are easily embarrassed and particularly sensitive to anyone trying to take advantage of them. Mary may take setbacks personally, and because of these attitudes, may not be objective and rational if involved in a personal dispute. The candidate will likely worry about the demands of a high pressure job. Mary will be tense when stressed and may find it hard to unwind after the work day ends.

Part 6 - Best Practice Information

Assessment Administration: Best Human Resources practice recommends that assessments be administered to candidates in a controlled environment under the supervision of a proctor to ensure that:

- The person who completes the assessment is in fact the candidate.
- A candidate's responses to the assessment questions are not affected by collusion with others or by other actions that would invalidate the assessment.
- The supervisor is able to address unexpected conditions or problems affecting a candidate and to provide reasonable accommodation for candidates where required.

Where a candidate completes the assessments without supervision the accuracy of the results cannot be guaranteed. In such circumstances you may wish to have the candidate retake the Prevue Assessments in a controlled environment at the time they attend your offices for an interview. For more information on the administration of the Prevue Assessment, please see "Administering the Prevue Assessments" in the Prevue How To Guides posted at www.prevueonline.com.

Assessment Weighting: The weight given to the Prevue Assessments in any human resource selection or other high stakes decision should not exceed one-third of the total decision making process. The remainder of the process, including the candidate's work history, interview, background checks, etc., should be considered together with the results of this report.

Ensuring Fairness: When properly administered, the use of the Prevue Assessments will help to ensure that job applicants are treated fairly without regard to race, colour, religion, sex or national origin. The Prevue Assessments have been designed and developed to conform to the human rights legislative and best practice requirements prevailing in the various countries where the Prevue Assessments are distributed. This includes the EEOC Guidelines, the Americans With Disabilities Act, and the standards for test development published by the American Psychological Association, the British Psychological Society, and the Association of Test Publishers.
